NEIGHBORHOOD LEADER PROGRAM

Dear Neighborhood Leader,

Thanks for signing up for the Democratic Party of Oregon Neighborhood Leader Program (NLP). You will be doing the most important work in politics today, simply by talking with a few of your neighbors.

The NLP plan is simple; we provide you with a list of approximately thirty-five households with registered Democrats who live close to you. Prior to the election, you will visit and talk with them. Your list of assigned voters and a map will be sent to you via email. You will be asked to log into the NLP Services website to get your material. Print out this material for your use. The slate cards will be printed by the county party. Please plan to pick up the slate cards.

We ask that you encourage the voters on your list to vote and give them a copy of our slate card. If you chose, you could also provide additional candidate literature.

Please make at least one attempt to speak with the people on your list. If they are not home, you can either leave the slate card and campaign literature or return another day. Many of our Neighborhood Leaders are making multiple attempts to have a face-to-face conversation. This persistence is based on the proven results of increased voter participation after a personal contact.

For each voter contact attempt, record the result on your printed list of voters. If the voter is not at home, leave the literature in a visible place for them to see and read. DO NOT PUT THE LIT IN THEIR MAILBOX! Handwrite a note letting the voter know who you are and, if you can, give them your phone number.

As soon as possible after you attempt contact with a voter, please log into your turf at NLP Services website and record your result.

On the weekend before the election, please plan to call the voters whose ballots have not yet been received and remind them to return their ballot to a drop off location (it will be too late to mail the ballot). This simple step is important to the success of this election. You can determine who has not yet returned a ballot by logging into your turf.

Lastly, we intend to continue this program through future elections. The goal of the program is for you to form relationships with your Democratic neighbors so that they have a personal connection to the Democratic Party. Have fun, talk to your neighbors, and let us know how it turns out.

Online Reporting of Canvas Results

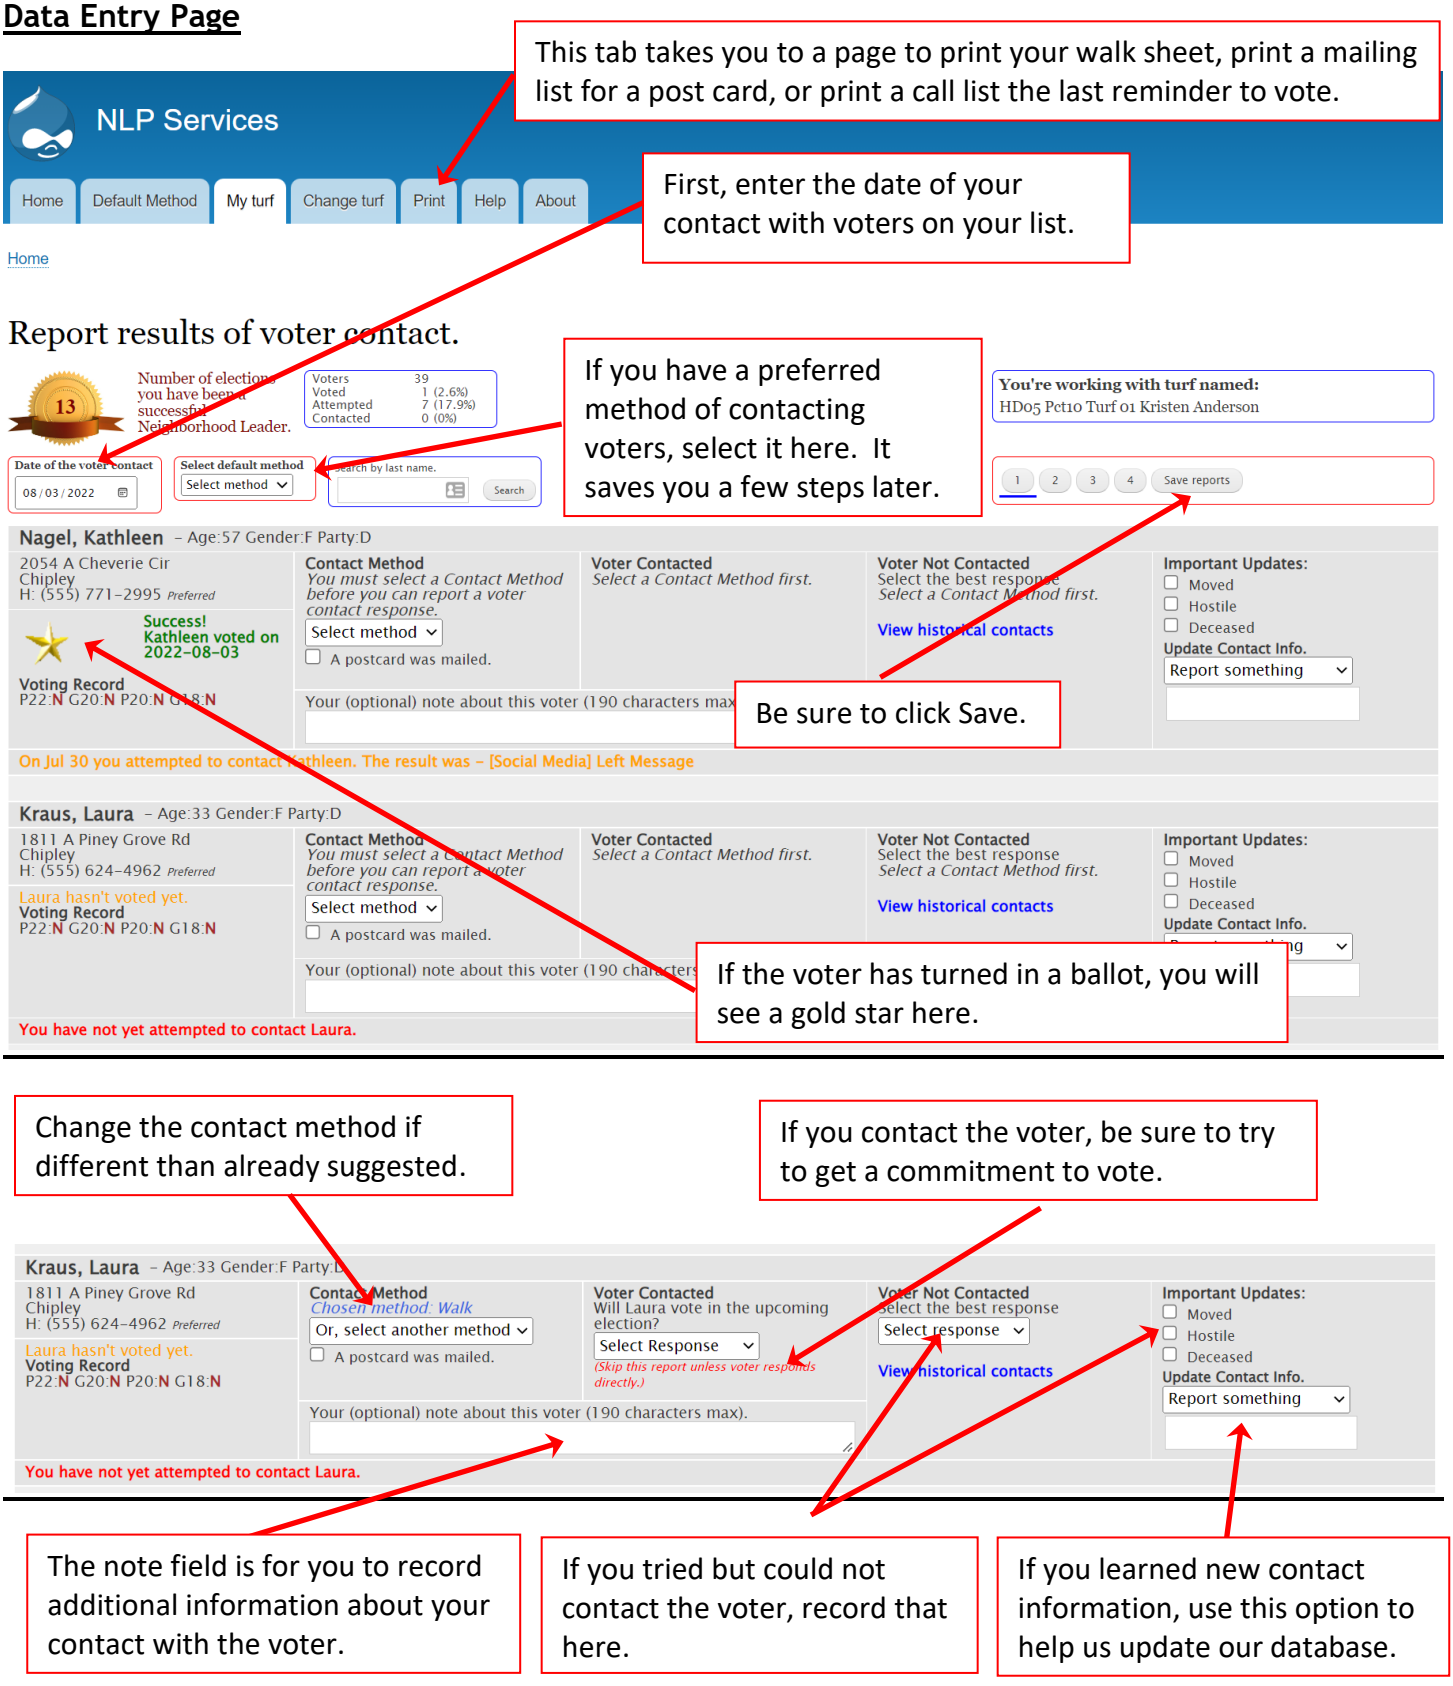

Canvass results that you report online are transferred to VoteBuilder, our state database for campaigns. Coordinated campaigns can see the result of your contact and can use it to improve their campaign results. It will be vitally important for all of us to complete our tasks and report results to enhance our chances of winning.

Most counties notified you of your turf with and email. That email included the link to the NLP Services site and your credentials to access that site. Some counties will provide that information in other ways, but your task is the same. Use the link and credentials provided to login to the site. Then click on the tab for “My Turf” to display your turf. That page will allow you to record your voter contact attempts and results.

Also, look at the help and the print tabs for more information about your task.

A personal contact is the most effective way to encourage someone to vote. When you contact a voter, please ask them to commit to vote in the upcoming election. When you fail to contact the voter, use the “No voter contact” option.

Data Entry Page

When you are done with data entry for these voters, either click “Save report” or click one of the page changes. If you do not do one of these choices, the contact information you entered will be lost.

The “Help” tab offers some information about the data entry. And the “Change turf” tab is available for those who have more than one turf.
